

■ Swasia's First Initiative – Badhana Pilot Project

Village Captain: Sattu Mama (Mama Ji)

Remote Coordinator: You (Canada)

Focus: Waste management & creating a clean, green, and beautiful Badhana

■ First 3■Month Plan

Month 1 – Awareness & Habits

- Teach families to separate wet and dry waste.
- Place **2 baskets** in each house (wet/dry).
- Community pledge: *“No burning of plastic.”*
- Mama Ji organizes a **Village Meeting** to launch Swasia.

Month 2 – Composting & Recycling

- Start **1 compost pit per mohalla (neighbourhood)**.
- Encourage families to put wet waste in the pit.
- Collect dry waste (plastic, bottles) for recycling.

Month 3 – Beautification & Trees

- Plant shade and fruit trees near homes, school, and temple.
- Families responsible for watering their trees.
- Organize a **“Clean Street Sunday”** once a month.

■ What We Track

- Number of families separating waste
- Number of compost pits built
- Number of trees planted
- Number of cleaned spots in the village

■ Your Habits (Canada)

- Every Sunday: Send Mama Ji 1 short teaching note (poster/video/voice message).
- Every Wednesday: Call Mama Ji to review progress.
- Every Month: Share photos & updates on Swasia's page/social media to inspire others.

■ Mama Ji's Habits (Badhana)

- Every Monday: Check if families are using two baskets (wet/dry waste).
- Every Thursday: Visit compost pits and ensure proper use.
- Every Friday: Motivate children in school to bring ideas for a cleaner village.
- Every Sunday: Lead “Clean Street” activity or tree watering drive.
- Every Month: Host a small village meeting to share Swasia's progress.

This way, Swasia's story begins in Badhana with a real, trackable project. Over time, we'll replicate this model in other villages.
